If you would like to browse the vegbank database on nimoy, you can now use phpPgAdmin . Click PostgreSQL in the left sidebar, log in as user vegbank with password vegbank , and click the + next to the vegbank database in the left sidebar to browse as you would in pgAdmin. To run a query, click the vegbank database in the left sidebar and SQL in the upper tab bar.

- Status changed from New to Resolved

- % Done changed from 80 to 100

We now map VegX->VegCore instead, and have a VegCore->VegBIEN mapping
