History

#1 - 12/15/2011 01:03 PM - Aaron Marcuse-Kubitza

- % Done changed from 50 to 90

I added a new mapping to get SALVIAS data directly from the salvias_plots database on nimoy. You can see the results in php-padmin, by running the following queries: (instructions for using php-padmin are on the wiki under php-padmin)

```
select * from plot;
select * from taxoninterpretation;
```

#2 - 01/04/2012 04:45 PM - Aaron Marcuse-Kubitza

- % Done changed from 90 to 70

We will also need to import the projects, stems, and lookup_MethodCode tables in order for all the verification queries to work

#3 - 02/09/2012 05:34 PM - Aaron Marcuse-Kubitza

- Status changed from New to Resolved
- % Done changed from 70 to 80

SALVIAS stems have been mapped. Mappings are in SVN under inputs/SALVIAS/maps
