

BIEN 3 - Task #472

replace accessioncodes with datasource_id+sourceaccessioncode

08/09/2012 12:18 PM - Aaron Marcuse-Kubitza

Status:	Rejected	Start date:	08/09/2012
Priority:	Normal	Due date:	
Assignee:	Aaron Marcuse-Kubitza	% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:			
Activity type:			
Description			
<ul style="list-style-type: none">• If we autopopulate the sourceaccessioncode using other input data (as some mappings do already), the datasource_id+sourceaccessioncode will be globally unique• This will serve the same purpose as accessioncode did in VegBank, but with two fields instead of one• It will simplify the schema, because we won't need to have both a sourceaccessioncode and an accessioncode, which can be confusing			

History

#1 - 02/14/2013 07:18 AM - Aaron Marcuse-Kubitza

- Status changed from New to Rejected

Accessioncode fields have been removed instead. Globally unique ID fields ([#561](#)) will eventually serve the purpose that accession codes did. (They also often consist of datasource+sourceaccessioncode).
