#### History

##### #1 - 11/08/2012 03:16 AM - Aaron Marcuse-Kubitza

- Status changed from New to Rejected

Shouldn't do this because it would prevent map spreadsheets from having multiple output locations for the same input column, which is used by TNRS import

##### #2 - 09/10/2014 03:58 PM - Aaron Marcuse-Kubitza

- Status changed from Rejected to New

multiple output locations for the same input column are now handled by source-specific derived columns, so this is now possible
