

## BIEN 3 - Task #560

### move VegCore data dictionary to a phpPgAdmin-accessible database

02/14/2013 04:12 AM - Aaron Marcuse-Kubitza

<b>Status:</b>	New	<b>Start date:</b>	02/14/2013
<b>Priority:</b>	Normal	<b>Due date:</b>	
<b>Assignee:</b>	Aaron Marcuse-Kubitza	<b>% Done:</b>	50%
<b>Category:</b>		<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>			
<b>Activity type:</b>			
<b>Description</b>			
<ul style="list-style-type: none"><li>term details go in column comments, with Redmine formatting translated to HTML</li><li>each synonym becomes a parameter to a function with the same name as the term, which COALESCEs the synonyms together</li></ul>			
<b>Modify phpPgAdmin to render HTML in column comments</b>			
<ul style="list-style-type: none"><li>don't strip HTML tags</li><li>wrap comment in a pre tag (but with normal font) instead of using a plain text-&gt;HTML translator</li><li>replace [[term]] with a permalink to the term</li> <li>display schema comment on schema's main page (tables list)</li></ul>			
<b>Create permalinking page</b>			
see <a href="#">vegbiendev</a> .			
<ul style="list-style-type: none"><li>permalinks can be made by linking to a shortened URL (e.g. from bit.ly), which points to a Javascript page that redirects to the appropriate phpPgAdmin page depending on the URL fragment (the fragment because URL shorteners don't pass along other parts of the URL)<ul style="list-style-type: none"><li>to ensure that permalinks are always valid, the Javascript page should translate synonyms using the <a href="#">VegCore thesaurus</a> (and fix capitalization using the <a href="#">VegCore vocabulary</a>)</li></ul></li></ul>
