

BIEN 3 - Task #915

Task # 928 (New): switch to new TNRS setup

Taxon Name Validation

05/12/2014 03:13 PM - Martha Narro

Status: New	Start date: 06/25/2014
Priority: Normal	Due date:
Assignee: Aaron Marcuse-Kubitza	% Done: 0%
Category:	Estimated time: 0.00 hour
Target version:	
Activity type: Coding/analysis	
Description 1. Please correct the following in taxonMorphospecies: 1.1. Family should be included in taxonMorphospecies only if the resolved genus is null. 1.2. Remove Author from taxonMorphospecies. It should never be included. <i>this is actually not the taxon name author, but the Unmatched_terms, which happen to be an unmatched author in some cases. to remove these, we would need to add a filter on the Unmatched_terms.</i> 2. After that, please change the taxon validation csv extracts to provide the following information: verbatim_name_with_author tnrs_input_name tnrs_taxonomic_status tnrs_accepted_name_family tnrs_accepted_name tnrs_accepted_name_author taxonMorphospecies (see #927) see VegBank.tnrs_names.xls . This format is similar to, but not exactly the same as the way you presented the data on for Salvias (https://projects.nceas.ucsb.edu/nceas/projects/bien/wiki/TaxonMorphospecies_creation). In the csv filename, please include the dataset name (VegBank, SALVIAS, Brian's pet plot). 3. Please send the group the instructions you have on how to form the taxonMorphospecies. see also formula in TNRS derived columns > scrubbed_morphospecies_binomial . instructions for forming taxonMorphospecies: from an e-mail from Brad : <pre># Reconstruct morphospecies using accepted names UPDATE observations SET morphospecies= TRIM(IF(acceptedSpecies IS NOT NULL,acceptedSpecies, IF(acceptedGenus IS NOT NULL,CONCAT(acceptedGenus," ",unmatchedTerms), IF(acceptedFamily IS NOT NULL,CONCAT(acceptedFamily," ",unmatchedTerms), IF(unmatchedTerms IS NOT NULL,unmatchedTerms,nameSubmitted)))));</pre> Subtasks: Task # 938: Enquist's taxon validation New
