BIEN 3 - Task #929

change TNRS client to store metadata

05/20/2014 04:26 PM - Aaron Marcuse-Kubitza

Status:	New	**Start date:**	05/20/2014
Priority:	Normal	**Due date:**	
Assignee:	Aaron Marcuse-Kubitza	**% Done:**	0%
Category:		**Estimated time:**	0.00 hour
Target version:			
Activity type:			

Description

- see details in 2013-06-13 conference call

- after implementing this, back-populate the metadata for previous batches:
    1. group the batches into runs by determining which invocation of the TNRS client (inputs/.TNRS/tnrs/logs/tnrs.make.log.sql > /^start time:/) the batch start time ("TNRS".taxon_match.batch) is part of
    2. determine the state of the repository, and the values of the download settings, at the time the run was started
        - assume that `svn up` was run right before the run was started
