Description

Define the Data Dictionary terms for VegBIEN and associated tables.

1. First define the (approximately 60) terms needed for the BIEN3-viewFullOccurrence table (attached). For terms defined in other name spaces (e.g., DwC, VegBank, Salvias, VegX), link to those definitions. see [VegBIEN data dictionary](#)
2. After those are finished, move on to completing the Data Dictionary for the rest of BIEN3 and associated tables.
3. The definitions need to be drafted and linked before June 9th (at least for terms in viewFullOccurrence and ideally for the entire Data Dictionary).
